forms of the Dichotomous Rasch Model, the Rating Scale Model (Andrich, 1978), the Partial Credit Model (Masters, 1982), the Facets Model (Linacre, 1989), the Linear Logistic Test Model (Fischer, 1973), the Item Bundle Model (Wilson and Adams, 1995), and others designed for more complex situations involving raters and other measurement features

Making Better Tests with the Rasch Measurement Model

model. While this paper will focus on how language teachers might use the Rasch measurement model, teachers of any subject can use the Rasch measurement model to better assess their students and/or validate their tests. The same principles of improved assessment and validation being demonstrated in this paper can be applied to any

AENSI Journals Journal of Applied Science and Agriculture

The study applied Rasch measurement model to the analysis since Rasch model complies the measurement properties which enable objective comparisons, useful predictions and the construction of firm bases of the physiological development (Wright, 1982; Andrich, 1988; Wright & Mok, 2004). This paper explains the process of ensuring the high
