Add a DS1307 clock to your AVR microcontroller

AVR microcontroller Bruce E Hall, W8BH Having a real-time clock (RTC) on your microcontroller can be very handy, especially for data logging operations The Maxim DS1307 is a common and inexpensive real-time clock It requires only two I/O lines for data communication If you want to add a clock to your AVR microcontroller,

AVR interfaces: SPI, I2C, and UART - W8BH

I2C, and UART on your AVR microcontroller 1) INTRODUCTION It took me a long time to get here I've used various flavors of AVR microcontrollers, writing to them in assembly, C, and Arduino "wiring/processing" For some reason, I always avoided using the built-in serial communication hardware Often I used someone else's serial library
