Tin - Wikipedia

Tin is a chemical element with the symbol Sn (from Latin: stannum) and atomic number 50 Tin is a silvery metal that characteristically has a faint yellow hue Tin, like indium, is soft enough to be cut without much force When a bar of tin is bent, the so-called "tin cry" can be heard as a result of twinning in tin crystals; this trait is shared by indium, cadmium, and frozen mercury Pure tin after solidifying keeps a mirror-like appearance similar to most metals However, in most tin alloys (such as pewter), the metal solidifies wit...
